## UX UI Designer

COVER LETTER

**Dear Hiring Manager,**

I am applying for the job posting where you have mentioned your need for a UX and UI Designer. I would be very happy if you please consider my candidature for the posting.

I want to give you a clear view about the contribution I can make to your product development efforts as a UX designer. My educational background is mainly Architecture, in which I hold a Bachelor of Interior Design degree. I began working in both section of Designing and Prototype. I also possess great skills in the graphic side of web design, experimenting with programs in the adobe Creative Suite, such as Photoshop, Illustrator and InDesign.

I have engaged myself in many UI related projects due to my strong background in creative UI designs. I would like to also add that I have developed a wide range of forward-thinking user interface programs, which have all improved user experience, and this has aided my talented knowledge in the course and responsibilities of this position. So, for every possible reason, I can claim that I have proficient knowledge in the process and responsibilities required for this position.

So, If you are looking for an expert UX and UI designer who knows not only where to put the submit button but exactly what it should look like, look no further. Understanding mobile programming is an important fact to know the user interest in UI. I have sharp knowledge over programming and designing of web and mobile software.

Thanks for considering,  
Sincerely  
Ragini Shirwalkar
